Access Community Therapists Ltd. Presents

Wheelchair Seating and Positioning in Community: Practical Applications

Presented by: Jo-Anne Chisholm, MSc. & Joanne Yip, BSR

This hands-on, intensive workshop is presented by Jo-Anne and Joanne who are Occupational Therapists with over 25 years specializing in wheelchair seating and positioning in various settings, from clinic to community with adults of varying disabilities. They have both presented extensively on seating and were co-presented the Mundy Award for Outstanding Contributions to the field by the Canadian Adaptive Seating and Mobility Association.

This workshop is designed for Occupational & Physiotherapists with beginner to intermediate seating skills working with adolescents and adults in the community. The focus of this workshop follows the seating process from the assessment stage through to follow-up of targeted outcomes.

After completion of this workshop, attendees will be able to understand and articulate the principles of seating, perform a complete seating assessment, thoroughly understand the roles of the client, therapist, vendor and service technicians, identify targeted outcomes for seating and determine product parameters for equipment trials. Attendees will learn how to provide justification for requested seating components, how to achieve optimal seating set-up and how to follow-up on the targeted outcomes.
